PROFESSIONAL SUMMARY

Backend Engineer with 4.7 years of experience designing and developing scalable RESTful APIs and microservices in the healthcare domain using Node.js, Express.js, MongoDB, Redis, Docker. Strong expertise in API security (JWT, OAuth2), cloud integrations, performance optimization, and event-driven architectures. Proven track record of delivering production-grade systems involving OCR, NLP, payments, appointment scheduling, subscriptions, and notifications. Seeking Backend Engineer / Node.js Developer / SDE-II roles.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript (Basic)

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, OAuth2, API Versioning, WebSockets, Background Jobs, Cron Jobs, Microservices, Event-Driven Architecture

Databases & Caching: MongoDB, MySQL (SQL), Redis

Cloud & DevOps: Microsoft Azure (Blob Storage, NLP/Text Analytics, Service Bus), Docker, CI/CD (GitHub Actions), Nginx

Tools & Observability: Postman, Swagger/OpenAPI, Git, Linux, Logging, Monitoring, Error Handling

PROFESSIONAL EXPERIENCE

Software Engineer L3 – Archents IT Pvt Ltd

Hyderabad, India | Nov 2021 – Present

- Designed and implemented scalable RESTful APIs using Node.js and Express.js for a cloud-native healthcare platform serving patients, doctors, pharmacies, and labs.
- Developed microservices and modular backend components with secure inter-service communication.
- Modeled MongoDB schemas, created indexes, and built aggregation pipelines to support high-throughput transactional workflows.
- Integrated Azure Blob Storage for secure medical document storage and Azure NLP/Text Analytics for extracting medical entities from clinical notes.
- Implemented JWT/OAuth2 authentication, role-based access control (RBAC), and API versioning to secure multi-tenant applications.
- Built event-driven workflows using Azure Service Bus for asynchronous processing, notifications, and background jobs.
- Containerized backend services using Docker and supported CI/CD pipelines via GitHub Actions across QA, staging, and production environments.

- Created Swagger/OpenAPI documentation, validated APIs using Postman, and collaborated in Agile SDLC with code reviews and sprint planning.

Key Achievements:

- Improved average API response time by ~50% using Redis caching, query optimization, and database indexing.
- Standardized deployments by Dockerizing microservices, reducing environment-related production issues.
- Implemented automated backup, logging, and monitoring pipelines, improving system reliability and incident response.

PROJECTS

Ciana Healthcare Platform (Microservices Architecture) – Backend Developer

- Developed patient services for user registration, profile management, appointment booking, wellness tracking, and prescription uploads with secure file storage on Azure Blob Storage.
- Integrated Face Scan AI module for vitals monitoring and PhonePe payment gateway for healthcare packages and consultation payments.
- Built doctor workflows for video consultations, EMR generation, digital prescriptions, and end-to-end appointment lifecycle management.
- Implemented RBAC, JWT authentication, and secure data access boundaries for multi-role users.
- Developed pharmacy services for inventory management, billing, medicine search, and automated low-stock purchase order generation.
- Built lab modules for test scheduling, technician workflows, PDF report uploads, secure signed URL downloads, and real-time status notifications.

EDUCATION

Bachelor of Technology – Computer Science, SVS Group of Institutes, Hanamkonda, Telangana (2017 – 2020)

Diploma – Computer Engineering, Government Polytechnic College, Warangal, Telangana (2014 – 2017)

SSC – Sujatha Vidyanikethan High School, Hasanparthy, Hanamkonda, Telangana (2004-2014)
